Market Release (*via electronic lodgement*)

## DUGAS & LEBLANC#3 WELL – ON PRODUCTION

### Napoleonville- Dugas & Leblanc #3 Well, Assumption Parish, Louisiana, Non-Operator 15.0% WI

The Board advises that the D&L#3 well has been placed on production at a rate of 1,500mcf/d in the 10ft "Stray B" Sand on a 10/64<sup>th</sup> inch choke. Due to the extremely high reservoir quality sands production rates may potentially be increased up to 4,000-5,000 mcf/d with the Stray sand being drawn down as quick as possible in order to then move to the "M" sand. The well's production rates will be assessed and increased following further production history.

Following a reserve review the Company has revised its estimated hydrocarbon potential in the M sand as follows:

	Oil (BBL)	Gas (MCF)
Projected Recoverable Reserve	400,000	1,200,000

The reserve potential of the M sand is expected to increase with reservoir performance data. The Company is expecting flow rates in the order of 300 - 400 bbls per day with around 800-1,000 mcf/d.

Partners in the D&L#3 well are:

Company	WI
Grand Gulf Energy Ltd	39.4%
Golden Gate Petroleum Ltd	15.0%
Other Partners	45.6%
